Field of the Invention The present invention relates to a system and method for establishing trust and a user registration center therefor. More particularly, the present invention relates to a system and method for establishing trust in a computerized environment based on an independent verification system and a user registration center therefor. 2. Related Art The advent of the World Wide Web (WWW) has had far-reaching implications for electronic commerce. As a result, a number of commercial enterprises are starting to establish Web sites to provide consumers access to their products. These Web sites typically make available product information and make available means for placing an order with the online merchant. The merchant may take the form of a merchant Web site, a xe2x80x9cstore-within-a-Web-site,xe2x80x9d a credit card transaction system or a check card system. The customer typically locates a merchant""s Web site by entering a uniform resource locator (URL) in a search engine, or in another manner, such as by typing a URL directly into the browser. The customer then typically provides a username and password, which is typically required by the merchant to establish
